

Industry Organisations and Institutions

Institute of Geological and Nuclear Sciences

The site contains information on volcanology, seismology, New Zealand geology, and nuclear sciences. It has links to the services provided by GNS, its databases, publications and contacts.

www.gns.cri.nz

New Zealand Minerals Industry Association

NZMIA is an incorporated society whose main activity is to support the explorers and producers of New Zealand's mineral resources. This comprehensive site includes background on the Association, mining industry issues, links to many of the sites listed here, and includes providers of services and suppliers to the mining industry in New Zealand. There is a strong educational component on the site.

Petroleum Exploration and Production Association of New Zealand

PEPANZ is an incorporated society, operating as a trade association, which promotes the interests of petroleum producers and explorers in New Zealand. Formerly known as PEANZ (Petroleum Exploration Association of New Zealand), the association was renamed in late 2004 to reflect the fact that the membership included most of the hydrocarbon producing companies in New Zealand.

PEPANZ was set up to represent private sector companies (holding petroleum exploration and mining permits), service companies and individuals working in the industry. The primary objective of PEPANZ is to publicise, promote and advance the interests of the oil and gas exploration industry in New Zealand.

www.pepanz.org

Australasian Institute of Mining and Metallurgy

The site has recently expanded with weekly reviews of events that can be emailed to members. Membership names and contact details are available to members only. Institute publications can be ordered on-line, and mineral valuation (Valmin) and Joint Ore Reserves Committee (JORC) codes can be downloaded free of charge. An employment section provides lists and details of employment opportunities in mining and members can list their curriculum vitae.

Straterra

Natural Resources of New Zealand Straterra was formed in 2008 as an industry-wide body to promote the realisation of New Zealand's mineral industry potential. Straterra offers a collective voice for the New Zealand resource sector, from small firms to large enterprises. Straterra works closely with the petroleum sector and has links to the geothermal sector.

www.straterra.co.nz

Geological Society of New Zealand

Information on GSNZ activities and publications. Useful links to on-line journals, society submissions on issues such as the Resource Management Act amendments, and abstracts of recent PhD theses and links to the home pages of geology and earth science departments of all seven New Zealand universities. It also includes links to employment agencies for earth scientists.
