

Exemption Form

Permit holder:

Permit(s):

Exemption sought

The permit holder seeks an exemption from the requirements of regulations 49-51 of the Crown Minerals (Petroleum) Regulations 2007 for the following wells drilled in the permit(s):

Surface wells (other than the first surface well drilled in a drilling programme) drilled within a 2 kilometre radius of the first surface well

except for core cut through a reservoir formation interval and any other samples that the permit holder considers are of significant value for archive purposes.

The permit holder considers that the provision of the drill cuttings, core samples and sidewall core samples required by regulations 49-51 in the circumstances described above are not reasonably required to enhance knowledge of the coal seam gas resources in the permit area.
