

Dear Sir/Madam

ANNUAL RETURN OF INDUSTRIAL ROCKS AND MINERALS OUTPUT 2019

New Zealand Petroleum & Minerals are collecting the production data of private quarries during calendar year 2019.

You can supply your data through:

- [Online quarry survey](#)
- PDF quarry survey form
- Template spreadsheet for bulk responses

You are encouraged to use the online survey to supply your data and we would recommend using Chrome if possible. Alternatively, you can supply your data via the PDF quarry survey form.

If you have more than 20 quarries and would like to do a bulk data input, we have prepared a template spreadsheet for you and it can be found on the website given below.

For more details, please visit:

<https://www.nzpam.govt.nz/our-industry/nz-minerals/minerals-data/industry-statistics/>

Please advise if a quarry is either closed or tick the “Nil” box in survey if your quarry did not operate during the year. Also, please provide current contact details of your operation in the survey.

To help us stay up to date with changes, if you are aware of new quarries operation in your region please send us the relevant information, including contact details for the quarry where possible.

We would appreciate if the survey could be completed before the 30th September 2020.

If you have any queries regarding this survey please email NZPAM-QuarriesSurvey@mbie.govt.nz.

Please be assured that all information collected will be treated as strictly confidential. Only regional totals will be released publicly and this will be restricted if the information is identifiable to a single operation.

Your support and assistance in providing this information is greatly appreciated.

Yours sincerely

Susan Baas
NATIONAL MANAGER PETROLEUM & MINERALS
New Zealand Petroleum & Minerals

**ANNUAL RETURN OF INDUSTRIAL ROCKS AND MINERALS OUTPUT 2019
FOR PERIOD 1 JANUARY 2019 TO 31 DECEMBER 2019**

Quarry Operator:

REF:

Quarry Name:

Operational during 2019: or, Nil Output: or, Closed: *(please tick appropriate box)*
(please fill in table below)

Please clarify whether units are cubic metres or tonnes or truckloads

Confidentiality of Information:

All information supplied to the ministry will be held in the strictest confidence, with no information relating to an individual organisation being released. Only aggregated data will be published. The ministry will restrict the publication of data in circumstances where the information is identifiable owing to the few numbers of operators in one particular region. This policy will apply when there are three or less operators in a defined area. Access to individual organisation's data will be restricted to approved ministry staff only.
