Annual minerals industry statistics and survey

The government releases annual production data and revenue generated from royalties for the extraction of crown owned minerals.

Annual return of industrial rocks and minerals output 2019

NZ Petroleum and Minerals (NZP&M) have launched the 2019 Annual Return of Industrial Rocks and Minerals Output survey for the calendar year 2019.

You can supply your data through:

- The new [online survey](#) (Chrome or Edge recommended)
- Downloading and completing a [PDF survey form \[PDF 548KB\]](#)
- For organisations with a large number of operations to report, there is a bulk response template spreadsheet available:

<iframe src="https://www.googletagmanager.com/ns.html?id=GTM-W8P33X" height="0" width="0" style="display:none;visibility:hidden"></iframe>

Skip Links

[Bulk response survey template \[XLSX 24KB\]](#)

We encourage you to use the online survey to supply your data. The survey can be accessed on PC, tablet or smartphone.

If you are unable to utilise any of the above methods, contact NZP&M via the email address below.

Complete the survey before **31 September 2020**.

Once the survey is completed, NZP&M will publish the statistics alongside production statistics for coal and metallic minerals.

All information collected will be treated as strictly confidential. Only regional totals will be released publicly and this will be restricted if the information is identifiable to a single operation.

If you have any queries regarding this survey please email NZPAM-QuarriesSurvey@mbie.govt.nz.

Annual minerals industry statistics

The Government revenue report includes total annual petroleum, minerals and coal royalties as well as energy resource levies (ERLs) collected by the government. Expenditure statistics summarise the investment made by region across the prospecting, exploration and production stages.

The production statistics feature coal, industrial minerals and metallic minerals groups. The report includes a national summary followed by metallic minerals data. Coal is broken down by mining method, rank and region and industrial minerals are sorted by region and commodity.

Metallic minerals produced are gold, silver and titanomagnetite ironsand. Rock, sand, and aggregate are produced for roading and construction and are vital for the development of New Zealand's infrastructure.

A number of other industrial rocks and minerals are produced for local and export markets. They include bentonite, various clays, diatomite, perlite, pumice, serpentine, silica and zeolite.
